Logo Rationale

The IBMTS logo is designed as an abstract geometric mark that fuses Islamic heritage with modern technological symbolism. It captures the essence of the Ibadan Muslim Tech Summit as a hub where faith, innovation, and professional excellence intersect.

1. The Hexagon Form

The hexagon is a shape deeply rooted in Islamic geometry, symbolizing balance, harmony, and interconnectedness. It also represents structural strength and networks, reflecting the foundation of technology and digital ecosystems. Its rounded edges soften the geometry, conveying inclusivity, openness, and approachability—values central to community building.

2. The Inner Star

At the heart of the hexagon lies a four-pointed abstract star, a subtle nod to Islamic symbolism, reflecting guidance, enlightenment, and shared values.

The star also acts as a spark of innovation, representing ideas, creativity, and breakthroughs that the summit inspires.

3. Abstract & Modern Aesthetic

By blending tradition with modern minimalism, the mark feels both timeless and forward-looking. Its clean, simplified design ensures versatility across print, digital, and event branding.

Symbolism & Interpretation

Together, the hexagon and star form a visual metaphor of community, guidance, and technology:

- Hexagon = Structure + Networks (Technology + Community)
- Star = Guidance + Innovation (Islamic values + Future vision)
- Rounded Aesthetic = Inclusivity + Collaboration
